Who we are

One partner for engineering, projects, performance and SHEQ

RN Consulting Group (RNC) is a South African consultancy that helps organisations plan, build and run their assets and operations better.

We offer four integrated services, delivered by a network of professionally registered specialists, each with more than 10 years' experience.

For every project we assemble the best-fit team, integrate the solution into your existing business and transfer skills so your people own the results.

- **Engineering Consulting**
- **Project Management Consulting**
- **Business Performance Optimisation**
- **SHEQ & Risk Management**

SECTORS WE SERVE

- Maritime
- Petrochemical
- Energy
- Logistics
- Infrastructure

Four integrated service pillars

One partner, from technical engineering to safe, compliant operations

01

Engineering Consulting

Engineering authority from scope to commissioning.

02

Project Management Consulting

Leading capital projects under EPCm and EPC models.

03

Business Performance Optimisation

Less waste, better efficiency, clear SOPs, more agility.

04

SHEQ & Risk Management

Practical, compliant safety, health, environment and quality solutions.

Delivered by professionally registered personnel and specialist consultants, each with 10+ years' experience, integrated into your business, with skills transferred to your team.

PILLAR 01

Engineering Consulting Services

We act as the engineering authority for asset owners and contractors. From scope definition through construction and commissioning, we make sure assets are engineered right, built to specification and handed over safely, ready to operate.

What we deliver

Scope development

Scope, design basis and engineering specifications

Quality & standards

Setting and assuring technical and quality standards

Contract management

Engineering contract strategy and administration

Field engineering

Resolving site queries quickly during construction

Commissioning support

Planning and supporting safe start-up and handover

Technical due diligence

Risk, compliance and technical audits

Project Management Consulting Services

Pillar 02: leading capital projects and portfolios from concept to close-out

We provide experienced project leadership for owners and contractors under EPCm and EPC delivery models. We set up the governance, controls and teams that keep projects safe, on schedule, within budget and aligned with strategic objectives, from pre-feasibility through to close-out.

- **EPCm & EPC project direction**
  project and construction management
- **PMO setup & governance**
  processes, procedures and project assurance
- **Capital project advisory**
  prioritisation, risk and capital efficiency
- **Project controls**
  planning, scheduling, cost and change control
- **Team & stakeholder coordination**
  including global work-share teams

PILLAR 03

Business Performance Optimisation

We look end-to-end across your value chain to find where time, materials and money are lost. Our Lean Six Sigma experts then fix the processes behind those losses and embed the changes so the gains last.

Across your value chain

Procure → Operate → Maintain → Deliver

Reduce wastage

Cut rework, idle time, excess stock and wasted steps

Improve efficiencies

Streamline workflows, remove bottlenecks, track KPIs

Develop SOPs

Capture best practice in controlled procedures

Improve agility

Faster decisions, an operating model that adapts

Certified Lean Six Sigma Black Belts

Lean removes waste and speeds up flow; Six Sigma uses data to cut variation and defects. The result: faster, more reliable processes.

PILLAR 04

SHEQ & Risk Management

Delivered by our SHEQ specialists providing sustainable, practical and client-specific solutions that protect people, the environment and product quality, and keep operations compliant.

Safety, health & risk

SHEQ systems

ISO 9001, 14001 and 45001 development, implementation and upkeep

Risk assessments

Baseline risk assessments, H&S specifications and project H&S files

Site H&S management

Full project health and safety and contractor management

Audits & investigations

Legal compliance and SHEQ audits; independent incident investigations

Regulatory compliance

OHS Act compliance and support during DEL and regulator inspections

SHEQ training

OHS Act, ISO and NMA training, plus process safety systems

ISO 9001:2015 **ISO 14001:2015** **ISO 45001:2018**

Quality & Environmental Services

Pillar 04: SHEQ & Risk Management, continued

Quality

Robust systems that prove you get it right every time

- ISO 9001 quality management systems
- ISO/IEC 17025 and SANAS accreditation
- Test method development and verification
- QA/QC procedures and work instructions
- Audits, root cause analysis and close-out
- Quality training and staff mentoring

Environmental

Measure, report and manage your impact

- ISO 14001 environmental management systems
- Stack emission monitoring
- Ambient air and dust fallout monitoring
- Environmental data analysis and reporting
- Pollution incidents and authority liaison
- Compliance with environmental legislation

ISO 9001 | **ISO 14001** | **ISO/IEC 17025** | **SANAS** | **ASTM D1739 | US EPA**

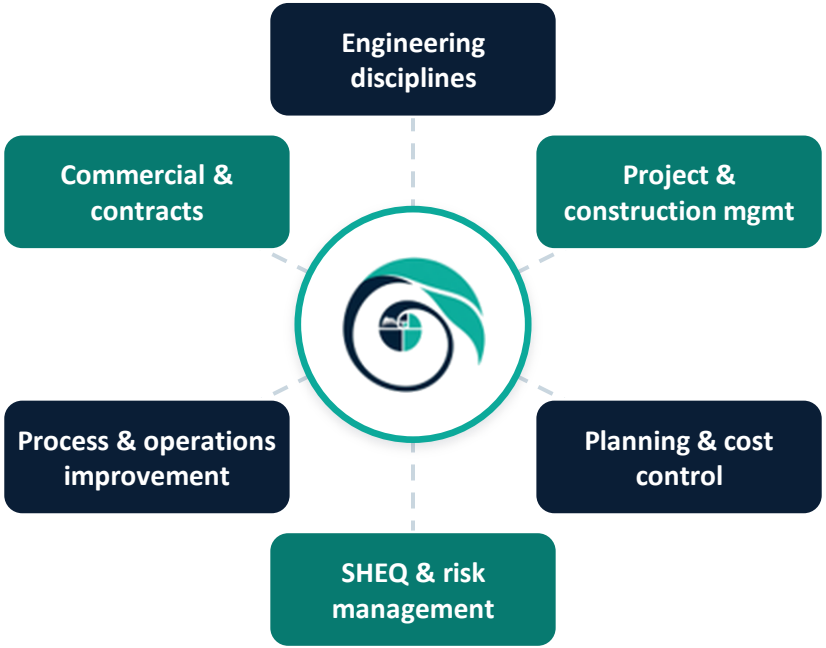

Our collaborative delivery model

The right expertise, assembled for each project

RNC maintains a repository of experienced personnel and specialist consultants. For every engagement we bring together the skills the project needs, working as one team under RNC leadership to deliver the best solution.

10+ Years' experience: the minimum for every RNC resource

100% Professionally registered: engineering, built environment, science, SHEQ, finance and legal

Why clients choose RNC

Technical depth, strategic advisory and mega-project delivery experience

- Registered professionals, each with 10+ years' experience
- Proven on mega capital projects (R14bn+)
- Strong regulatory and compliance knowledge
- Technical depth combined with strategic advice
- Committed to mentoring and skills development

Professional registrations across our network

Engineers, all disciplines ECSA	**Project & Construction Mgrs** SACPCMP	**Quantity Surveyors (Pr QS)** SACQSP
Architects SACAP	**Natural Scientists** SACNASP	**SHEQ Professionals** SACPCMP | SAIOSH
Chartered Accountants SAICA	**Quality Assurance & Control** Certified QA / QC	**Legal Specialists** Legal Practice Council

Solutions that stay in your business

We work within your existing business and leave capability behind

1 — Understand

Diagnose the current state with your team on the ground

2 — Assemble

Configure the best-fit team from our network

3 — Design & deliver

Develop practical solutions to your requirements

4 — Integrate

Embed into your existing systems, structures and processes

5 — Transfer skills

Coaching, mentoring and training so your people own it

Integrated, not bolted on

Solutions are built around your existing people, systems and processes, with no parallel structures.

Capability that stays

Skills transfer is part of every engagement, including mentoring towards ECSA and SACPCMP registration.

How we can work with you

Flexible ways to engage RNC, shaped around your needs

Extra capacity

Slot into your teams during peak demand or capacity constraints

Skills gaps

Registered specialists to close critical skills shortages

Specialist provider

Specialist services that uphold your quality and client relationships

Bids & sub-consulting

Sub-consult or collaborate with you on bids and tenders

Once-off optimisation

One-off optimisation of processes across your value chain

Training & mentoring

Training, mentoring and skills transfer for your people

Start with a pilot project

Give us a pilot project and experience how RNC works first-hand, before committing to a larger engagement.

Let's talk

Let's build something sustainable
